

MOLY GREASE

G00728

This product is a non-melt, gray-colored lubricant containing molybdenum disulfide. This product is fortified to provide anti-wear and low friction performance through a wide temperature range. The molybdenum disulfide contained in this product reduces friction and protects against excessive wear, from extreme loads, galling and seizing. The moly "plates out" on metal surfaces, imparting extra protection to the parts and extending the lubrication cycle. This product is exceptionally resistant to most acids, salt spray, steam, dirt, dust, water, oxidation and weather. Our product has excellent adhesive and cohesive properties, as well as high shock protection. This product protects equipment indoors or outdoors, even under high temperatures and heavy loads.
